WORLD CLASS MRI SCANNERS AT MELOMED HOSPITALS

Morton & Partners is committed to maintain high levels of imaging technology at all branches. Our aim is to provide excellent diagnostic images for viewing by radiologists and referring clinicians.

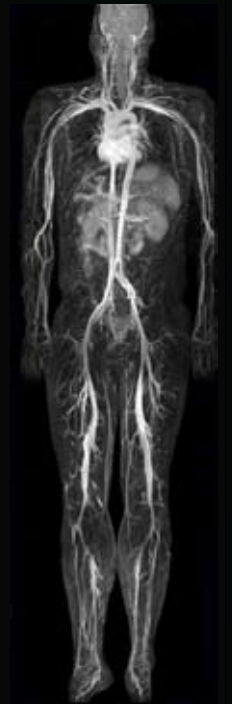

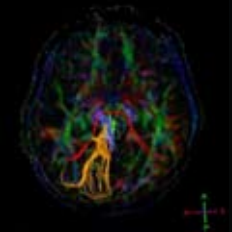

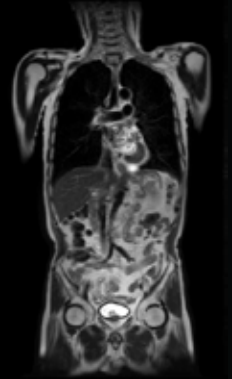

We are proud to announce that the Gatesville and Bellville branches have been equipped with state of the art MRI units to extend our services with the best equipment available today.

Melomed Bellville Hospital MRI

The GE Signa HDxt 1.5 is engineered with high- definition applications optimized for each anatomical area. We can deliver images with the enhanced contrast, clarity and accuracy our referring clinicians need. The MR applications include the latest software with specialized modules for Neurological, Body and MSK imaging.

Gatesville Medical Centre MRI

The Philips 1.5T Achieva MRI makes use of patented SENSE technology to limit imaging time and improve scan tolerance by patients, without compromising quality and resolution. As at our other sites, this unit boasts the latest innovative software packages for neurological, hepatobiliary and musculoskeletal imaging.
