

MORTON & PARTNERS
RADIOLOGISTS

NEWSLETTER

Morton & Partners are proud to announce the opening of their 8th Cape Town branch at the Rondebosch Medical Centre.

This department is the first in our practice to open as a fully digital filmless imaging centre linked to our Picture Archiving and Communication System (PACS). Reports and images will be available to referring clinicians on the hospital network when it is developed in due course and currently images are reported by radiologists at our Milnerton branch. The system promotes a rapid turnaround time for patients and images are distributed to referring doctors outside the hospital on CD.

Our CDs can be opened on a computer with Microsoft Windows XP or a later version. We offer a support service; please call 083 607 4613 for assistance.

Our vision for this department is to develop a specialized imaging facility to support the clinical specialists at the hospital and particularly to meet the dedicated requirements of the Oncology service that is to be based here. Currently we offer an x-ray service only, but more modalities will be added as the various hospital departments and consulting facilities become active.

Our business hours are currently 08:30 – 17:00.

For further information please contact our department:

021 689 7717 or send us an e-mail: enquiries@morton.co.za

Directions are available on our website: www.morton.co.za

Morton & Partners are committed to deliver a top quality service to our referring doctors and to their patients in Cape Town. We look forward to being part of the Rondebosch community!
